PRODUCTS

# Platform for a connected world

Accelerating your smart business

Home care • Security • Energy

# Joint platform

## Fast way to a connected world

Together, Bosch Software Innovations and Develco Products provide a platform for businesses within the fields of security, home care, and energy management. The platform combines Develco Products' white label IoT products with ProSyst Gateway Software and Remote Manager, enabling solution providers to rapidly develop and deploy new applications, services, and solutions for a smart and connected world.

## Interoperability

ProSyst Gateway Software is implemented on Develco Products' multiprotocol Squid.link Gateway that connects to the ProSyst Remote Manager in a cloud backend. The support of manifold protocols ensures interoperability, meaning that Develco Products' devices are easily integrated into a turnkey solution.

**Develco Products**  
White label devices  
with ProSyst Gateway Software

**ProSyst Remote Manager**  
Flexible and easy integration of  
devices on a cloud environment  
via open standards.

**Solution Providers**  
Short time-to-market by easily connecting  
devices and company systems.

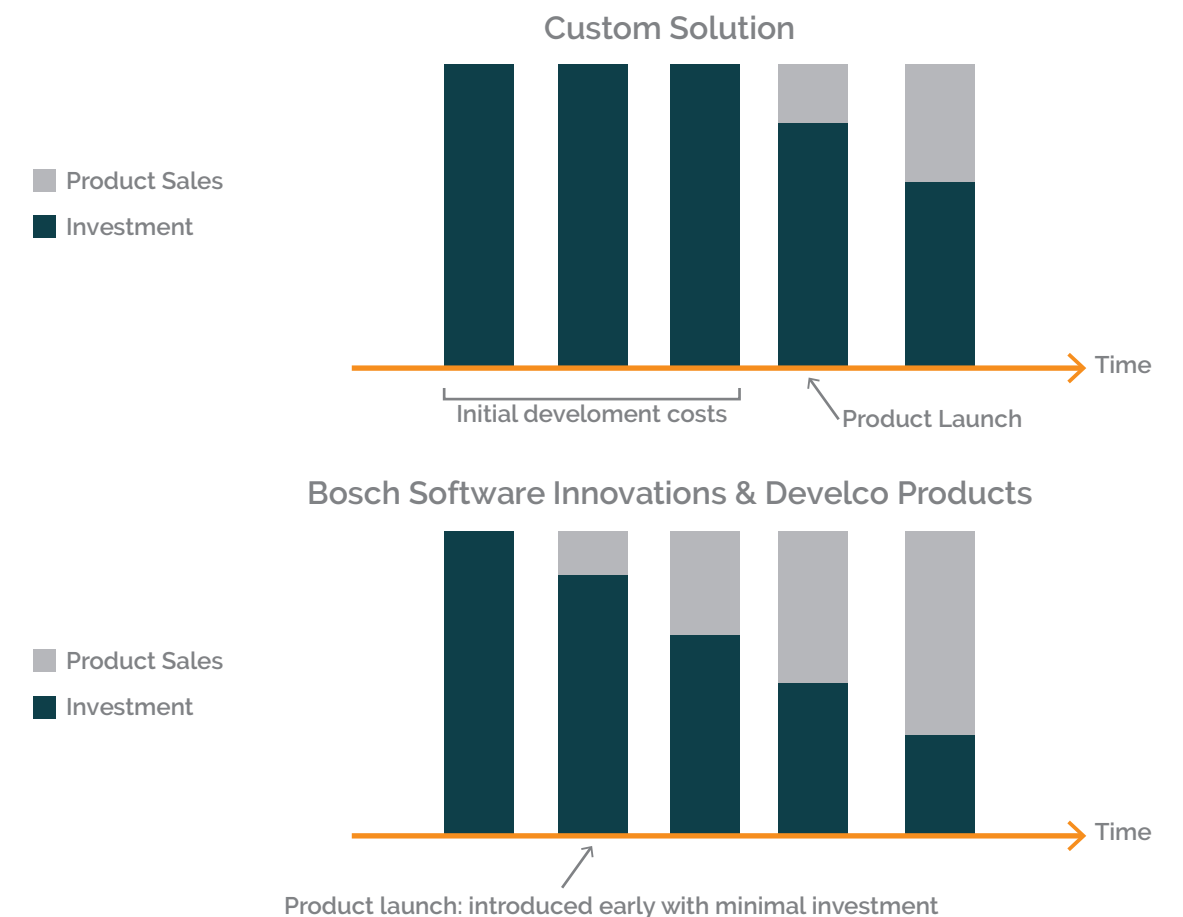

## Users can:

- Remove complexity.
- Focus on their core competences.
- Integrate any intelligent device into their solution.
- Quickly and easily develop applications and get started doing business.
- Develop, deploy, and manage solutions to meet the needs of their customers.

# Connecting everything

## Short time to market

The joint platform guarantees a short time to market. It removes complexity, meaning that solution providers can start doing business quickly. Support and maintenance is offered by a dedicated team of professionals ensuring that every project is successful. Moreover, solution providers can concentrate on their core competences.

## Scale with the customers

A key benefit of the joint platform is its scalability. By being open and modular, it offers the opportunity for solution providers to scale their solution whenever it is necessary. This means that when a sudden growth in demand appears the solution can be extended with confidence according to the needs of the customers.

# Open software platform

## Device management based on open standards

By using an OSGi-based open and modular software framework, the ProSyst Gateway Software and Remote Manager provide users with a high level of flexibility. In contrast to other software solutions, Bosch Software Innovations' device management software allows secure and rapid integration of devices and third-party applications. The modular approach makes it possible to add new functionalities to an IoT solution independent of a specific vendor, product, or technology.

## Integration with existing systems

Besides preventing users from being locked to one vendor, Bosch Software Innovations' software also allows integration with existing business systems. With this adaptability, it enables a quick and cost effective development of IoT solutions.

## Expanding opportunities

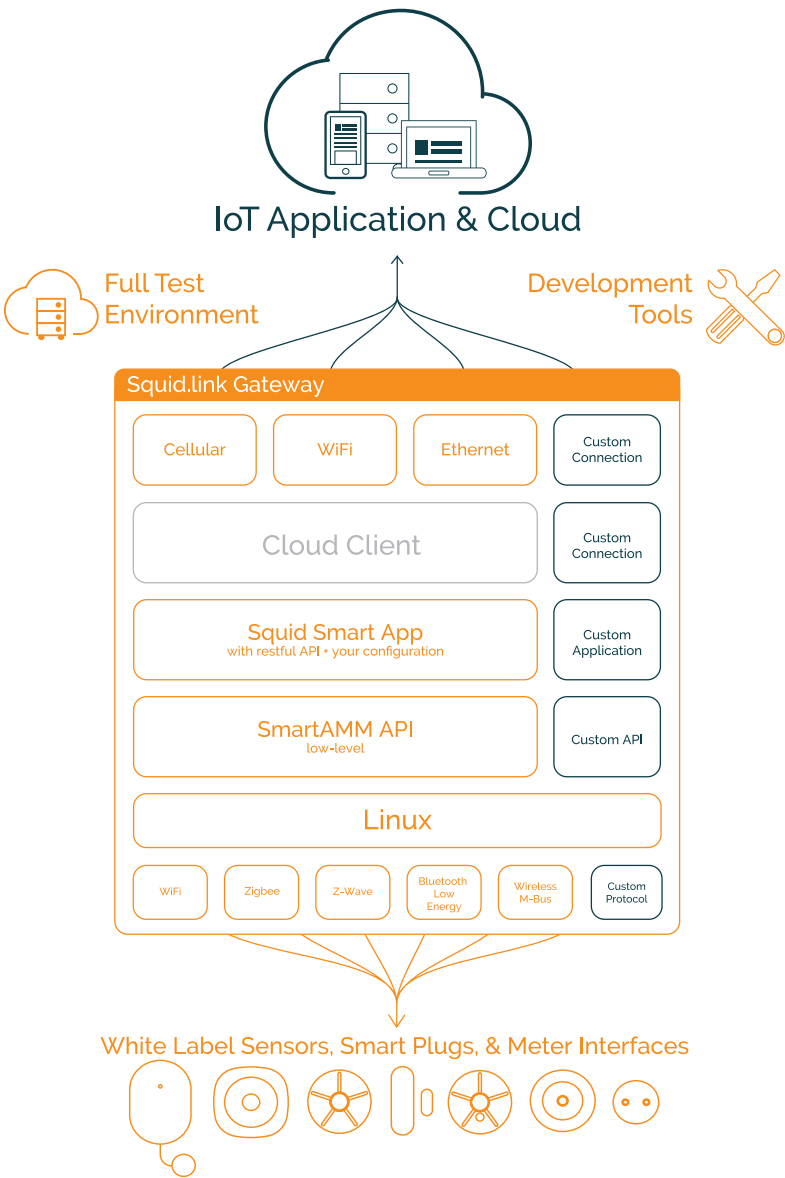

The Bosch Software Innovations' software is expanding the opportunities of IoT solutions by offering:

- No vendor lock-in
- High flexibility
- Adaptability

# Open hardware platform

## White label hardware for the entire IoT industry

Develco Products' wireless hardware platform includes a gateway, alarms, sensors, smart plugs, and meter interfaces. The platform is fully open, meaning that any app for any business area can be built on top of it. The wireless protocols integrated in the platform are naturally vigorously tested to ensure reliability, compatibility, and security.

## Developer's dream

Application developers will greatly appreciate the platform's:

- Great interoperability
- Flexibility and complex local intelligence
- Multiple protocol functionality
- Broad system compatibility (open source, Linux operating system)

Sectors and industries that typically use Develco Products' hardware platform successfully range from public healthcare service providers to commercial building automation providers.

Applications developed on Develco Products' platform are as varied as access control systems for airports and intelligent toilets in hospitals.

# Experience the platform

## Out of the box

Experience the platform with the box offered by Develco Products and Bosch Software Innovations. The box enables solution providers to get one step ahead of increasing the potential and functionality of their solution.

## Contents:

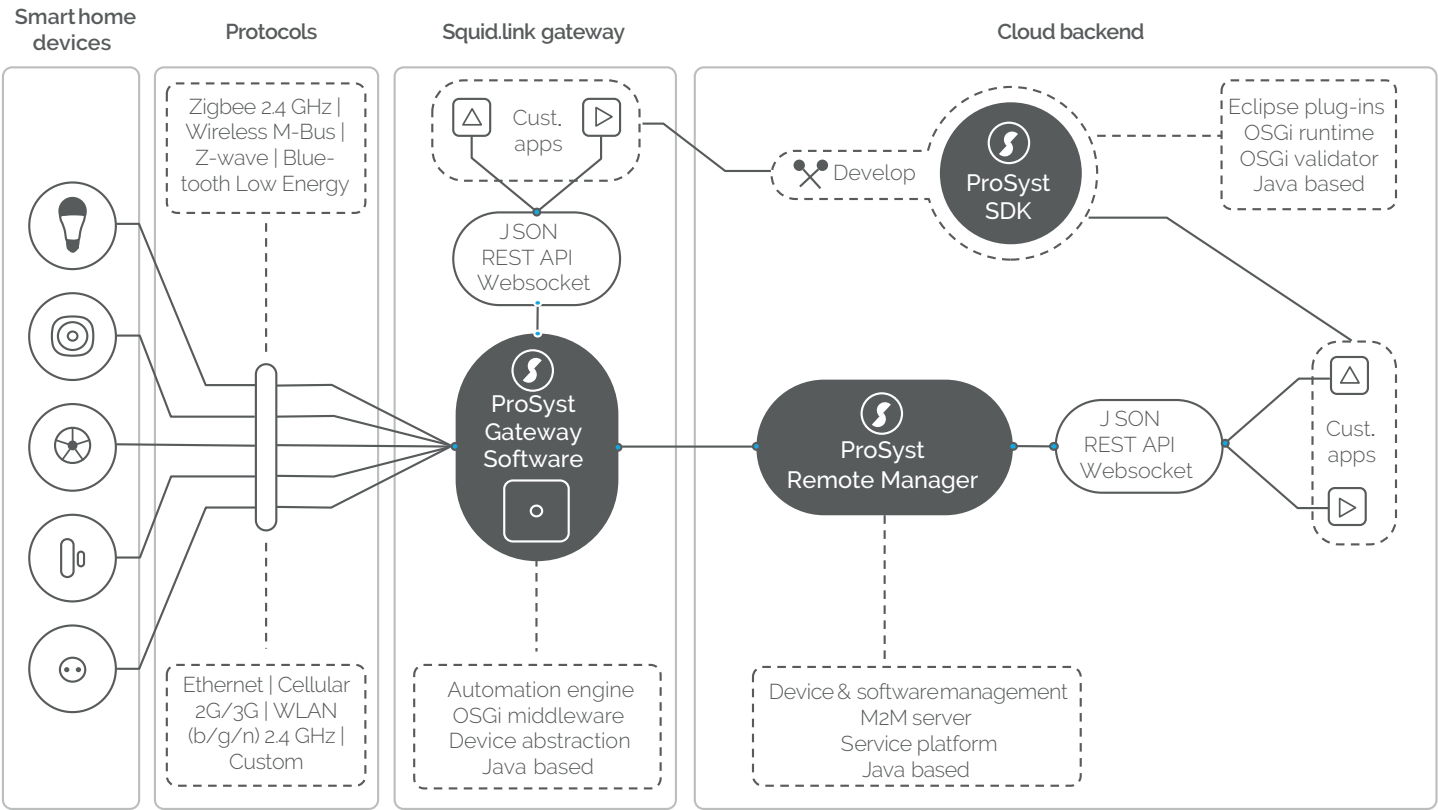

- White label products in a box
- ProSyst demo application
- Access to support forum
- Documentation for an easy start

# Get started now

## End-to-end platform

With the platform offered by Bosch Software Innovations and Develco Products, you are provided with a complete hardware and software solution, allowing you to start developing your business right away.

## The process

Move fast from the kick off of a project to designing your solution. Test out the solution in pilots before rolling it out.
